Summary

I am a Master's in Computer Applications student with a solid foundation in web development, data structures, and algorithms. I have hands-on experience in building full-stack applications using technologies like Node.js, Express.js, MongoDB, and React.js. My projects demonstrate my ability to develop interactive and responsive web applications, along with secure backend systems featuring user authentication and role-based access control.

Education

Lovely Professional University , Master in Computer Application	Aug 2023 – May 2025
• CGPA: 6.77	
Shri Giriraj Maharaj , Bachelor in Computer Science	Aug 2019 – June 2022
• CGPA: 6.74	
S.J.B.S.S.M (Goverdhan) , Science	Apr 2017 – Mar 2019
• CGPA: 7.37	

Certificates

Data Structure and Algorithm(DSA) : Codehelp	Feb 14, 2024
React : Cypherschool	March 5, 2025

Projects

URL Shortener Web App

Developed a full-stack URL shortening service with secure user authentication using JWT and cookies.
Implemented short URL generation, click analytics, and visit tracking using MongoDB.
Enabled user-specific dashboards showing all generated short links with usage stats.
Built modular backend architecture with MVC pattern and clean route separation.
Created dynamic EJS-based UI with form handling, validation, and session-aware rendering.

Simon Game

Developed a fully interactive browser-based version of the classic Simon Game using HTML, CSS, JavaScript, and jQuery.
Implemented game logic that dynamically generates a random sequence of colors which the player must repeat, with increasing difficulty at each level.
Designed a responsive user interface featuring CSS animations for visual feedback and a game-over effect for failed attempts.
Integrated sound effects using JavaScript's Audio API to enhance user engagement.

Technologies

Languages: C++ , Python, JavaScript, HTML, CSS, NOSQL

Technologies: Express JS, Node JS

Soft Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design
