Projects

E-Commerce web application

Jan 2025 – Feb 2025

- Developed a scalable E-commerce Backend Application using Node.js, Express.js, and MongoDB, enabling seamless user and admin interactions, product management, and cart functionality.
- Implemented secure user authentication and authorization using JWT (JSON Web Tokens), allowing distinct login flows for users and administrators with role-based access control
- Designed and integrated APIs for user account creation, login, product management (add/delete), and cart operations, ensuring smooth communication between the frontend and backend systems.
- Built a user-friendly cart system where users can add products, while admins can manage inventory by adding or deleting products, enhancing the overall user experience.

Simon game | HTML, CSS, JavaScript

July 2024 – Aug 2024

- Developed a fully interactive browser-based version of the classic Simon Game using HTML, CSS, JavaScript, and jQuery.
- Implemented game logic that dynamically generates a random sequence of colors which the player must repeat, with increasing difficulty at each level.
- Designed a responsive user interface featuring CSS animations for visual feedback and a game-over effect for failed attempts.
- Integrated sound effects using JavaScript's Audio API to enhance user engagement.

Certificates

Data Structure and algorithm (DSA) : Codehelp.com

Feb 14st, 2024

React : Cypherschool.com

March 5st, 2025

Technical Skills

Languages : C++, Python , JavaScript , HTML, CSS, SQL

Framework/Technologies : React JS, Express JS, Node JS

Soft skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design.

Educational

Lovely Professional University Punjab
Master of Computer Application — CGPA: 6.6

2023 – 2025
Jalandhar, Punjab

Giriraj Maharaj College
Bachelor of Science(Computer)— Percentage: 64%

2019 – 2022
Mathura UP

S.J.B.S.S.M (Goverdhan) – 12th with Science : 70%

2018-2019
