Projects

Netflix Clone / HTML, CSS, JavaScript

- Developed a responsive Netflix clone using HTML and CSS. □ Replicated the popular streaming service's user interface.
- Showcased proficiency in front-end web development, including layout design and styling.
- Ensured compatibility across various devices with responsive elements.
- Demonstrated ability to create visually appealing and user-friendly web applications.

Page Replacement Algorithm Visualizer | HTML, CSS, JavaScript

March 2024 – April 2024

- Implemented a stepwise approach to showcase the algorithm's execution, displaying the order of page requests and the corresponding frames in a user-friendly manner.
- Detailed Views: Clicking on a step or frame provides detailed information about what happened at that point. This could be a popup, a dedicated section on the page, or a side panel with more in-depth details.
- Annotations and Explanations: Each step can include annotations or explanations, helping users understand what the algorithm is doing and why. This is especially useful for educational purposes.

Certificates

Software Engineering

Saylor.org

Feb 1st, 2024

Data Structure and algorithm (DSA)

Codehelp.com

March 14th, 2024

Full stack web development

Cypherschool.com

July 10th, 2024

Technical Skills

Languages C++, Python

Technologies/Frameworks: React JS

Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design, Scripting in Python.

Educational

Lovely Professional University Punjab

Master of Computer Application — CGPA: 7

2023 – 2025

Jalandhar, Punjab

Giriraj Maharaj College

Bachelor of Science(Computer)— Percentage: 64%

2019 – 2022

Mathura, UP
